REVISION

2025.02.17

EXPERIENCE

Instrumentation Technologist - Magellan Aerospace

2021.04 - 2023.01 | Winnipeg, MB

- Maintained production equipment for aerospace lines (F-35 JSF, GE F414, RADARSAT), performing preventive and corrective maintenance.
- Troubleshoot and repaired electrical and electronic control systems including field devices, relays, and contactors.
- Worked on Allen-Bradley PLCs, SCADA, and human-machine interfaces for automated production equipment.
- Configured process control loops and analyzed system performance to ensure compliance with specifications.
- Liaised with maintenance teams, operators, and machine representatives to coordinate upgrades and repairs.
- Assisted in the development of troubleshooting routines and testing procedures for industrial equipment.
- Performed calibration and adjustments to maintain production equipment to specification.

Simulator Technician II / Maintenance Technologist - CAE

2023.01 - Present | Winnipeg, MB

- On-site maintenance for Lockheed CP-140 Aurora Trainer at 402 Squadron, CFB Winnipeg.
- Performed preventive and corrective maintenance per DND Maintenance Contract.
- Debugged complex technologies: avionic systems, software, networking, simulation technologies.
- Chair, Workplace Health & Safety Committee - ensuring a safe and compliant workplace environment.
